Fantasy football draft spreadsheet 2019 reddit

New Version/Version 7.02 August 9 Fixed calculates errors Auction lapa fixed some sort buttons do not work in the calculation with FFC formula fixed player names not copying any more when importing from the old sheet Misc. down with different rankings and ADPs changing formats v4.01 Google Drafter Added sleeper ADP/rankings taken from fantasydata.com (api they used to be updated faster than what's on this site because the numbers I have are close but not always accurate. Better than nothing) Updated beersheet functionality Who I'm working on: GoogleSheet drafter - IDP version & Auction versionssoduce the size of the page by consolidating a bunch of rankings and ADP is on the backend (1 Google sheet instead of many) adding sleeping ADP's You will need Excel to use this tool - Use the Google Drafter lite version of Mac Users Versions Excel before 2015 will not be able to use the refresh data button because web queries are not supported. Everything else should work fine. Excel for Mac 2015 files are opened read-only - make sure that you enable macros and allow online data sources when these pop-up programs occur. You should still be able to edit the page, and then go to File > Save As to get rid of read-only status. Lightweight GoogleSheet drafter v4.01 with playerlist and draftboard.v4.0 Make Copy here Please note conditional formatting is slow - not much can I do that - sorry. CSG Project Grader v1.0 googledrive | MediaFire by Dropbox few people asked for something like this to whipped it quickly and thought that I got properly.it working just import your completed project from the main CSG page and awarded grades based on predicted points/beersheets in va/ECR/furcita instructions sheet Features: Support up to 20 teams in the league, 40 rounds, holders, pick trade (and minor IDP support coming soon) Beersheet support (pasting BeerSheet applies to your league) Spreadsheet with rankings, ADPs and more from different locations, updates as you draft/Draftboard that updates as you input picks/Depth Charts that update/Draft pick marketing support/Sid Summary Page/Basic Guide: Open the League Info Tab and put your league settings screenshot back to the Overall tab and hide columns of data you don't need & refresh data sources if you feel that Screenshot/Begin development by double-clicking in the Pick Num column box, corresponding to the player who has developed the next Screenshot/To get more detailed instructions / descriptions of the data page / u / ihateconnecticut was a great breakdown from last year's here/CSG Keeper Helper Sheet v3.0 As most of you know ESPN changed all of their site layout, it broke as my import from the ESPN button worked, and the only solution I've been able to find is for the user to paste his magazine page from the ESPN page, not the biggest but better than nothing. CSG Keeper Helper Sheet v3.0 Dropbox/CSG Keeper Helper Sheet v3.0 Google Drive/CSG Keeper Helper Sheet v3.0 MediaFire/Made this tool to help if you have to enter many holders. Holders. automatically import your ESPN logs. Guide: Go to the Keeper Helper page and the CSG Fantasy page. Go to the keeper page and if you have an ESPN league to use the ESPN tab, if you don't use the manual tab Enter your league settings Enter a draft pick order that matches each team At import your ESPN league or manually enter your players/input round players are kept. The picking number will be updated automatically. Once finished pressed Export/Go to the CSG Fantasy page and go to ESPN import or Manual import based on your league site/Hit Import/Keepers automatically added to the correct position - use the CSG fantasy page as you normally would. The only real sources I could find that were easy to export were ESPN and Yahoo - so that's all I really have on the page at the moment in terms of average project prices and default site prices. But that's the beginning. Added nfl AAV. Here are some instructions and screenshots: Main Page - look mostly the same here, you just have to enter the price and the owner of the player/Here is the place, where it will follow each team's logs, budgets, etc. (got lazy here and wanted to get the page out - will work on formatting empty slots) League Setting Page - looks mostly the same, just have to enter your league budget and ESPN/Yahoo values will adjust to match/Again - not a whole lot on it, but if you're looking for something basic to follow your auction project you can find this usefulness for me to know if you wanted to have additional features. Resources & Credit: VBD/Auction Estimated Values and Inflated Values and Related Calculations from /u/elboberto's Auction Spreadsheet/Draftboard-style credit: /u/daruuk/Draft choose odd calculations credit/u/bizarbus/Tiers credits to Boris Chen, /u/Prayes/Drafting Style, Pick Trading & various other ideas /u/ManhattanBeachBum/BeerSheets/u/Beer4TheBeerGod/Cleaned up a bunch of formatting (buttons and columns - thanks to /u/ridelist for macros) Rankings/ESPN: Pre-draft Rankings (manually updated here: GoogleSheets)/Yahoo: Pre-draft Rankings (manually updated here: GoogleSheets) NFL: Pre-draft Rankings (manually updated here: GoogleSheets) ECR /PPR/0.5 PPR/Rookies/Dynasty and Point Predictions: 2 Previous Version v8.08 (Auctions only) Sep. 2 3 M Fixed some VBD calculations that caused problems with some types of league. What's new 8.07 Fixed some PC Gold calculations/Fixed Formatting errors/Fixed depth chart formulas/Auction Beersheet formatting added the ability to paste or enter old auction projects and scale the estimated \$ per player to match your league trends based on this previous project. Fixed some injury formulas backend/Who am I working on: Adding IDP to standard GoogleSheet version/updating project grader/add page users paste fantasypro custom auction values/making input user friendly/You will need Excel to use this tool - Use Google Drafter for lite lite Excel Users Versions will not be able to use the data refresh button before 2015 because web queries are not supported. Everything else should work fine. Excel for Mac 2015 files are opened read-only - make sure that you enable macros and allow online data sources when these pop-up programs occur. You should still be able to edit the page, and then go to File > Save As to get rid of read-only status. Guide now find here/Sy you download from Google Drive click on the Download button does not open with pages button, you do not need to request edit access. If you really want to try using the full page of google pages, then you can download it and move it to your google drive/Features: Supports up to 20 teams in the league, 40 rounds, keepers, pick trade, IDP/Beersheet support (downloading pasting the Beer Excelsheet file that applies to your league) Spreadsheet with rankings, ADPs and more from various sites that update as you draft/Draftboard, that updates as you input picks/Team Summary Page/Auction Version/ESPN/Yahoo/NFL auction values and AAV's (all from the above draft league rankings) Here are some instructions and screenshots: Main Page - look mostly the same here, you just have to enter the price and the owner of the player/Here is if it will follow up on each team of rosters, budgets, etc. Lighter version of the page that runs google pages/Type copy here/Intracra version of the auction page that works on google pages/Former copy here/CSG Keeper Helper Sheet v3.0/CSG Keeper Helper Sheet v3.0 Google Drive/CSG Keeper Helper Sheet v3.0 MediaFire/Made this tool to help if you have input many operators. Resources & Credit: VBD/Auction Estimated Values and Inflated Values and related calculations from /u/elboberto's Auction Spreadsheet/Draftboard-style credit: /u/daruuk/Draft choose odd calculations credit/u/bizarbus/Tiers credit to Boris Chen, /u/Prayes/Drafting Style, Pick Trading & various other ideas/u/ManhattanBeachBum/BeerSheets/u/Beer4TheBeerGod/Cleaned up a bunch of formatting (buttons and columns - thanks/u/ridelist for macros) Page 2 I made this spreadsheet that scrapes fantasypros stat predictions, calculates the relative value of each player, and takes them in descending order. Feel free to use it for your project and expand on this page! Here's a link to Google Spreadsheet. The spreadsheet pulls stat predictions through web scraping, and I've added options to change the rating calculations based off your league rules. The great thing about this page is that you don't have to manually input player stat predictions every time they change, Google sheets it automatically to you using IMPORTHTML. (For some reason, it doesn't work with ADP - so I've inputted them manually) Details: Relative value is the same compared to substitution. For those who are not familiar with the concept of value-based development, check out this article from footballguys here. Spreadsheet automatically calculates the replacement value for each position point and the boundary point you have indicated. The default cutoff point is 100. Let me know what you guys thinkedit: typos Page 2 comments comments
